ITALIAN ENTREPRENEURSHIP AND FAMILY

Polypiù embodies the evolution of an entrepreneurial tradition rooted in Italian industry. Founded in 2006 by Domenico, Cristina and Elisabetta Moretti, the company carries on the legacy of Polyù Italiana Spa, established in the late 1970s by siblings Angelo and Vitale Moretti, pioneers in the European production of honeycomb polycarbonate systems. 2017 marked a strengthening of the link with the family roots through the entry of Andrea and Marco Moretti on the board of directors, ensuring continuity and a new impetus for the company, known for its commitment to innovation in the construction sector.

Today, **Polypiù** is a leading Italian manufacturer of polycarbonate systems and sheets, essential for roofing, curtain walling and industrial glazing. The company is a key partner for designers, installers and architects, offering effective, state-of-the-art solutions.

Looking to the future, Polypiù has expanded its international presence, opening new offices in Poland and Australia and increasing exports, which now reach 75 countries and account for 20% of total sales. In Italy, the historical pole in Corbetta has been joined by the new headquarters in Modugno (BA), strategic for relations with Southern Italy. Thanks to continuous investments in design and new production lines, **Polypiù** stands out on the market, responding promptly to customers' needs and anticipating industry trends.

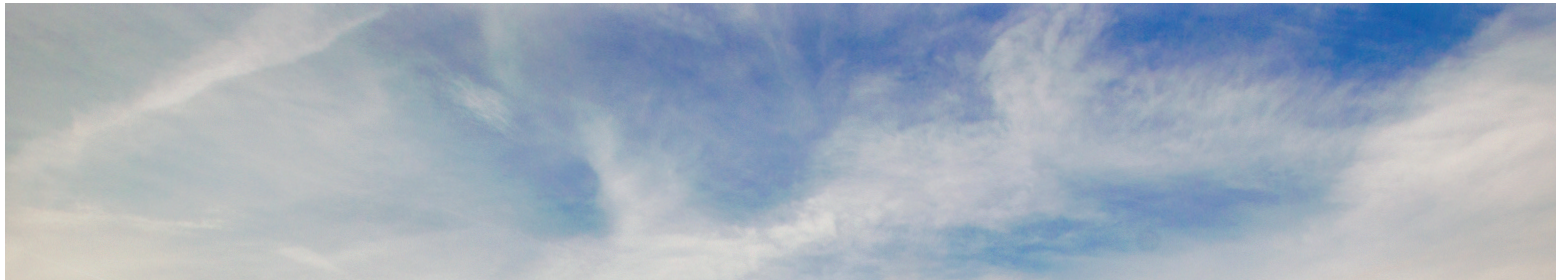

THE DISTRICT OF POLYCARBONATE

Polypiù has transformed its **40,000** square metre industrial complex into the production heart of the polycarbonate industry, uniting management, business development, technical research, production and logistics under one roof. This industrial district represents a true hub of innovation and operational efficiency.

The head office coordinates the strategies that drive the expansion and consolidation of **Polypiù** as a market leader. The commercial department develops new markets and strengthens the international presence, while the technical department innovates through research and development of advanced polycarbonate solutions. The production line, equipped with state-of-the-art technology, ensures the highest product quality, while optimised logistics guarantee effective and timely global distribution. The Polycarbonate District has become a model of operational excellence, where every stage of the production process is integrated to accelerate innovation and improve business performance.

FLORIM CERAMICHE (2017) / Fiorano Modenese, Italia

The carpentry-built walkway and stairway was covered in the parapets and lower part with the Panelpiù 500/16 in a diffusing opaline colour, illuminated in the lower part with green LED. Thanks to the tongue-and-groove joint, the walkway appears as a continuous translucent element, providing a harmonious aesthetic effect with a strong visual impact.

PAVILLON BS.02 DUCATI (2022) / *Bologna, Italy*

An entire wall of the new pavilion dedicated to finishing aesthetic finish was realised with Panelpiù **500/65 14 Walls**, which gives a large amount of natural light inside the building, while ensuring high thermal insulation, which contributed to its NZEB certification.

PAVILLON ARTS & SCIENCES | GOLINELLI FOUNDATION (2017)

Bologna, Italy

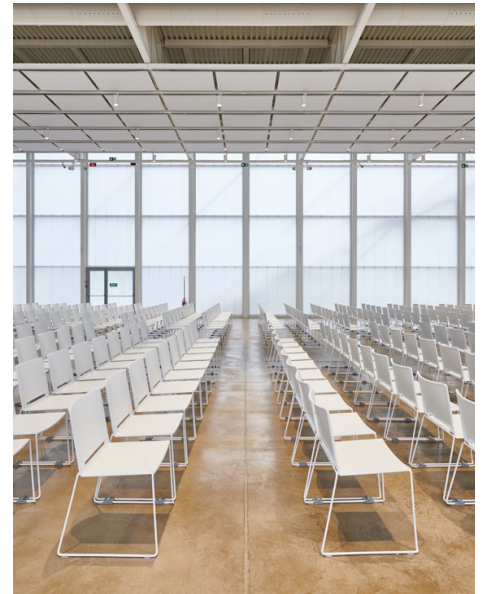

For the realization of the façades of the Arts and Sciences Center at Golinelli Foundation, the product **Panelpiù 40 Matt** was used. The matt finish favours a more homogeneous diffusion of light, yet keeping the transparency, giving in this way a unique and stylish look to the building during night hours.

Restyling of waste-to-energy plant in Desio (2022) / Desio, Italy

The restyling of the Desio waste-to-energy plant involved the use of **Panelpiù 500/40** in the two-tone version, with one colour on the outer face and another on the inner face. The orange on the outside gives a bright colour note, the opaline on the inside allows more light to diffuse when the cladding is backlit in the evening. The longest panels measure 17.8 m.

PALAZZETTO DELLO SPORT (2024) / Olgiate Olona, Italy

The new gymnasium in Olgiate Olona is characterised by a translucent volume made of **Panelpiù 500/55 14 Walls**, mounted in a double skin, which injects diffused light and establishes a relationship with the sky, also thanks to its mimetic ability to reflect different colours and transform chromatically depending on the time of day. The double skin provides excellent thermal and acoustic insulation values

BORSONI THEATER (2024)/ *Brescia, Italy*

In the revitalisation project for Brescia's Porta Milano district, the Borsoni Theatre plays an important role. Its stage tower has been clad, on two sides, with **Panelpiù 500/40 10 walls**. The panels have a length of 10 m and the opaline colour allows the backlighting of the wall facing the theatre entrance to be more diffuse.

CAPANNONE 15/C PARCO INNOVAZIONE REGGIANE (2024)/ *Reggio Emilia, Italy*

The Pavillion Host the multimedia classrooms and laboratories for the University of Reggio Emilia, separated by a covered square in the centre of the complex by a double wall in polycarbonate, made with our Panelpiù **500/40 5 Walls** opaline coloured. The double wall improves thermal and acoustic insulation and ensures continuity and uniformity on both sides, concealing the load-bearing structure.

34 BIENAL DE ARTE DE SÃO PAULO (2021)/ *Brazil*

On the occasion of the 34th São Paulo Art Biennial, the **Smartpiù onda 76/18** sheet was used to create interior walls. Thanks to its high degree of flexibility, this slab is able to adapt to the soft lines drawn by the designer and, in addition to bringing in natural light, acts as a guideline for visitors' eyes.

POLYPIU®

POLYPIU: Innovazione ed eccellenza nel policarbonato. Scopri Polypiu, leader nel settore dei materiali in policarbonato. Con la nostra tagline "Reimagine Colors", ci impegniamo a superare i limiti tradizionali, offrendo soluzioni innovative e di alta qualità per architetti e designer. Grazie alla nostra esperienza consolidata e alla costante ricerca di innovazione, garantiamo prodotti affidabili e versatili per l'edilizia industriale, commerciale e civile.

Fondata nel 2006, Polypiu incarna l'eccellenza dell'impresa familiare italiana, ereditando una tradizione radicata nel settore industriale. Con una presenza internazionale in costante crescita, offriamo soluzioni avanzate in policarbonato per una vasta gamma di applicazioni, dalla produzione di lastre e sistemi a progetti architettonici di design.

La nostra sede centrale, un vero e proprio hub industriale, coordina ogni fase del processo produttivo, garantendo innovazione, efficienza operativa e qualità ineguagliabile. Il nostro Dipartimento Tecnico sviluppa trattamenti speciali per migliorare le prestazioni del policarbonato, anticipando le esigenze del mercato e offrendo soluzioni all'avanguardia.

Con il nostro impegno per l'innovazione, il rispetto dell'ambiente e l'eccellenza operativa, Polypiu è pronta a plasmare il futuro del settore dei materiali in policarbonato, guidando l'industria verso nuove frontiere di eccellenza e innovazione.
